

Exhibit 1

Diversion Point A – Clump of trees near center of picture indicate location of spring/seepage water that is first collected and then diverted into the two dark green diversion ditches.

July 24, 2003

Exhibit 2

Downstream picture of two ditches leading away from Diversion A. (There is no real upstream of Diversion A since the water originates as spring/seepage water.) Cena Reservoir #3 is proposed to be constructed in the very center of picture, right in between the two ditches.

Exhibit 4

Landscape picture of two places of storage. Water body to the left is Cena Reservoir #1. Water body in the center (largely covered with dark green, tall, aquatic vegetation) is Cena Reservoir #2. Water body to the right is Fiock Reservoir #2, water right owned by Dale Kuck, License 4287.

July 24, 2003

Exhibit 5  
Much closer picture of Cena Reservoir #1, near the south shore, looking north.  
July 28, 2003

Exhibit 6

Point of Rediversion B- This is a picture of Rediversion Point B—the small channel connecting Cena Reservoir #2 and Cena Reservoir #1. The channel in this picture is all but obscured due to the overgrowth of grass. The channel begins just in front of the large clump of tall aquatic vegetation on the left of the photo (Cena Reservoir #2) and then cuts to the right. (The “downstream photo.”)

July 28, 2003

Exhibit 7

Point of Rediversion B- This picture reveals a little more of the small channel connecting Cena Reservoir #2 and Cena Reservoir #1. The photographer is standing in the channel and the channel leads directly away from the photographer toward Cena Reservoir #1.. (The "upstream photo.")

July 28, 2003

Exhibit 8

Point of Rediversion C- This is a picture of Rediversion Point C—the small channel connecting Cena Reservoir #1 with Fiock Reservoir #1. The channel begins in the clump of tall aquatic vegetation to the right of the picture. (The “downstream photo.”)
